CLAIMS

What is claimed is:

- 1 1. A servo writer for writing servo information onto
- 2 a disk of a hard disk drive, comprising:
- a housing with an inner chamber that can receive the
- 4 disk of the hard disk drive;
- a circuit that writes servo information onto the disk;
- 6 and,
- 7 a medium control system that is coupled to said inner
- 8 chamber to create a fluid medium density within said inner
- 9 chamber to be less than a density of air at one atmosphere.
- 1 2. The servo writer of claim 1, wherein said medium
- 2 control system includes a pump to maintain a pressure of
- 3 said inner chamber below one atmosphere.
- 1 3. The servo writer of claim 1, wherein said medium
- 2 control system includes a source of helium that fills said
- 3 inner chamber with helium.
- 1 4. The servo writer of claim 1, further comprising a
- 2 spindle located within said inner chamber.

BJY/wrj

- 1 5. The servo writer of claim 1, wherein said housing
- 2 is located within a clean room.
- 1 6. A servo writer for writing servo information onto
- 2 a disk of a hard disk drive, comprising:
- a housing with an inner chamber that can receive the
- 4 disk of the hard disk drive;
- 5 a circuit that writes servo information onto the disk;
- 6 and,
- 7 medium control means for creating a fluid medium
- 8 density within said inner chamber to be less than a density
- 9 of air at atmospheric pressure.
- 7. The servo writer of claim 6, wherein said medium
- 2 control means includes a pump to maintain a pressure of
- 3 said inner chamber below one atmosphere.
- 1 8. The servo writer of claim 6, wherein said medium
- 2 control means includes a source of helium that fills said
- 3 inner chamber with helium.

- 9. The servo writer of claim 6, further comprising a
- 2 spindle located within said inner chamber.
- 1 10. The servo writer of claim 6, wherein said housing
- 2 is located within a clean room.
- 1 11. A method for writing servo information onto a disk
- 2 of a hard disk drive, comprising:
- 3 placing a disk into a inner chamber of a housing;
- 4 creating a condition within the inner chamber so that a
- 5 density of a fluid medium in the inner chamber is less than
- 6 a density of air at one atmosphere; and,
- 7 writing servo information onto the disk.
- 1 12. The method of claim 11, wherein the condition is
- 2 created by pulling a vacuum within the inner chamber.
- 1 13. The method of claim 11, wherein the condition is
- 2 created by filling the inner chamber with helium.
- 1 14. The method of claim 11, wherein the disk is loaded
- 2 onto a spindle located within the inner chamber.

- 1 15. The method of claim 11, wherein the housing is
- 2 located within a clean room.
- 1 16. The method of claim 11, wherein a hard disk drive
- 2 that contains the disk is placed into the inner chamber.
